BRAND BOOK

a curated community for female solopreneurs

Version 1.0 · June 2026

Brand Overview

Mission

A curated community for established female solopreneurs done building in isolation — and ready for genuine friendships, honest conversations, and people who truly get it.

Belief

Women building solo businesses don't need more courses or PDFs. They need real friendships with people who understand the journey. One meaningful conversation can change the trajectory of a business.

Positioning

Warm authority. Intimate scale. Personal curation. Not networking — real connection. Not hustle culture — sustainable, aligned growth. Every member personally reviewed before joining.

Voice & Tone

ALWAYS USE

- ✓ Genuine, real, honest
- ✓ Friendship, connection, belonging
- ✓ Solo, curated, intimate
- ✓ You deserve this
- ✓ Speak to one woman directly — use 'you'
- ✓ Acknowledge the hard stuff before the solution
- ✓ Warm, editorial, unhurried tone

NEVER USE

- ✗ Hustle, scale, tribe, 10x
- ✗ Girl boss, empower, unlock, crush it
- ✗ Exceptional, disrupt, pivot
- ✗ Corporate or clinical language
- ✗ Bullet-point copy on the website
- ✗ Exclamation marks (unless already there)
- ✗ Centred body text

Usage Rules

01 Burgundy dominates

Burgundy should always be the dominant colour (60–70% visual weight). Dusty rose is the accent. Cream is the canvas. Never let dusty rose take over — the moment it tips too warm it reads as a wellness brand, not a curated professional community.

03 Logo on dark backgrounds

Use the cream wordmark on burgundy or dark backgrounds. Use the burgundy wordmark on cream/white backgrounds. Never place the wordmark on a photo without a solid colour overlay underneath.

05 Spacing and breathing room

The brand feels intimate and editorial — not packed. Leave generous whitespace. A sparse layout is always preferable to a crowded one. When in doubt, remove an element.

02 No palette drift

Do not add oranges, yellows, or bright reds. The palette holds its warmth through the burgundy–blush range only. Introducing a warm accent colour resets the brand recognition counter to zero.

04 Typography pair is fixed

Cambria italic bold for all display / heading text. Arial regular for all body copy and UI labels. Do not substitute other fonts. Do not use Calibri, Aptos, or system defaults.

06 External links: always new tab

All external links open in a new tab. All social links, Calendly, Eventbrite, and Tally forms are external. `rel='noopener noreferrer'` on all of them.
